PERFORMANCE FEES

The fund charges no performance fees.

TOTAL EXPENSE RATIO (TER)

2.07% (March 2016)

INVESTMENT OBJECTIVE

The fund seeks to provide investors with a balance between capital growth, and income from dividends and interest received on investments. The portfolio aims to maintain an equity exposure between 40 and 60% at all times. From time to time surplus cash positions are held in anticipation of the identification of appropriate investment opportunities. The portfolio's investment style is one of *value investing* (an investment strategy based on buying shares which is trading at less than its true worth) and is managed in accordance with a typical pension fund portfolio.

INVESTOR PROFILE

The fund is appropriate for all investors looking for a balanced fund providing returns in excess of inflation over the long term. It is appropriate for both investors saving for retirement, as well as investors that have already retired. Investments require longer-term investment periods to provide the expected returns. Short-term declines in the value of the portfolio could happen as a result of the fund's equity exposure, as well as its exposure to bonds that could be negatively affected by a rise in interest rates. Investors with a short-term requirement for the funds invested should not consider this portfolio as a suitable investment as the investment require longer-term investment periods to provide the expected returns.

MARKET AND PORTFOLIO OVERVIEW

- The portfolio continues to be heavily invested in equities irrespective of the volatility that is seen in the equity markets;
- The portfolio continues to maintain an over-exposure to Rand hedge investments as the fund manager believes that all emerging markets are at risk with regards to currency shock;
- The portfolio is looking to increase its international exposure in the coming months;
- The Foord Global Equity Feeder Fund is currently closed for new investments and the manager will seek alternative options in the international market;
- The portfolio anticipates lowering its equity exposure as well as increasing its exposure to Rand hedge investments in the medium term (three to six years).

ASSET ALLOCATION

INVESTMENT PORTFOLIO

Investment	% OF FUND
IFM Technical Fund	55.69%
Foord Global Equity Feeder Fund	20.40%
Stanlib Global Bond Feeder Fund	13.05%

DISCLAIMER

IFM Fund Managers (RF)(Pty)Ltd (IFM) is an approved CISC Management Company. Portfolios are managed by Heiden Grimaud Asset Management (Pty) Ltd (HGAM), an authorized Financial Services Provider (FSP Reg No.:594). The custodian/trustee of the unit trusts is Société Générale, contactable on Tel: 011 448 8800, Email : sgtrustee@sgss.socgen.co.za. Collective Investment Schemes in Securities (Unit Trusts) are generally medium- to long-term investments. The value of the participatory interests (units) may go down as well as up and past performance is not necessarily a guide to the future. Performance is calculated for the portfolio. Individual investor performance may differ as a result of the actual investment date, the date of re-investment and withholding taxes. Performance may be affected by changes in the market or economic conditions and legal, regulatory and tax requirements. IFM does not provide any guarantee either with respect to the capital or the performance return of the investment. Unit trusts are trading at ruling prices and can engage in borrowing. IFM does not engage in script lending. Commission and incentives may be paid and if so, this cost is not borne by the investor. A schedule of fees and charges is available on request. Distributions may be subject to mandatory withholding taxes. A fund of funds invests only in other Collective Investment Schemes, which may levy their own charges, which could result in a higher fee structure for these portfolios.

IFM is authorized to close the portfolio to new investors in order to manage the portfolio more efficiently in accordance with its mandate. This document is not an advertisement, but is provided exclusively for information purposes and should not be regarded as an offer or solicitation to purchase, sell or otherwise deal with any particular investment. A general investor report, prepared quarterly, is available on www.heidengrimaud.co.za. Forecasts and commentaries are provided for information purposes only and are not guaranteed to occur. While we have taken and will continue to take care that the information contained herein is true and correct, we request that you report any errors to IFM at admin@itransactfm.co.za. The document is protected by copyright and may not be altered without prior written consent.

UNIT PRICE

Unit trust prices are calculated on a net asset value basis, which is the total value of all assets in the portfolio including any income accruals and less any permissible deductions from the portfolio. Forward pricing is used. Prices are determined at 15h00 each business day (9h00 the following business day for Fund of Funds) and are published daily in national newspapers. The cut-off time for instructions is 14h00 each business day.

TOTAL EXPENSE RATION (TER)

A TOTAL EXPENSE RATIO (TER) is a measure of a portfolio's annual expenses, fees and charges, expressed as a percentage of the average daily value of the portfolio. These expenses include the annual management fees, VAT, audit fees, bank charges and costs incurred in any underlying funds. A higher TER ratio does not necessarily imply a poor return, nor does a low TER ratio imply a good return. The current TER ratio cannot be regarded as an indication of future TER ratios. Performance return information and prices are always stated net of the expenses, fees and charges included in the TER ratio.

FOREIGN INVESTMENT RISK

The portfolio may include underlying foreign investments (either direct or indirect). Fluctuations or movements in exchange rates may cause the value of underlying foreign investments to go up and down. The underlying foreign investments may be adversely affected by political instability as well as exchange controls, changes in taxation, foreign investment policies, restrictions on repatriation of investments and other restriction and controls that may be imposed by the relevant authorities in the relevant countries.

This is a Minimum Disclosure Document (MDD) as required by Circular BN92 issued by the Financial Services Board that became effective on 1 April 2015.
